

Get the Most Out of Your Windows Server & SQL Migration with the Neudesic Cloud Factory and Microsoft Azure

Improve agility, increase innovation, and reduce costs with the fastest, safest, and most cost-effective framework

The Azure Advantage

Reduce costs through outstanding offers

Protect workloads with unmatched security

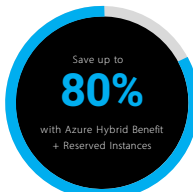

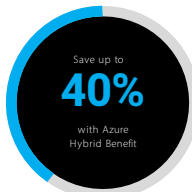

Operate anywhere with seamless hybrid capabilities

Modernize apps with unparalleled innovation

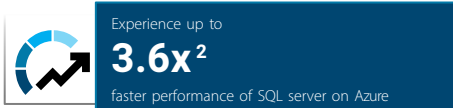

Bring existing Windows Server and SQL Server licenses to Azure

With Azure Hybrid Benefit, you can maximize your existing investments and transition to the cloud at your own pace

Migrate to Azure and get **3 years of free extended security updates** for your 2008/R2 workloads from the date of end of support

Get industry-leading price performance with SQL on Windows Server on Azure

Protect apps, data, and IT workloads in Azure

Windows Server offers best-in-class security with built-in protection in Windows Server VMs and Azure Security Center

- 8 trillion threat signals analyzed daily
- 3,500 security experts
- \$1 billion per year investment in security

Azure Security Center

Unified security management across hybrid cloud workloads

Azure Sentinel

AI-driven Security Information and Event Management (SIEM)

SQL Analytics

Unique database security monitoring for your cloud SQL

Update Management

Automation tool to manage operating system updates

Azure Confidential Computing

Protect and secure data while it is in use

Take advantage of cloud innovations for on-premises workloads

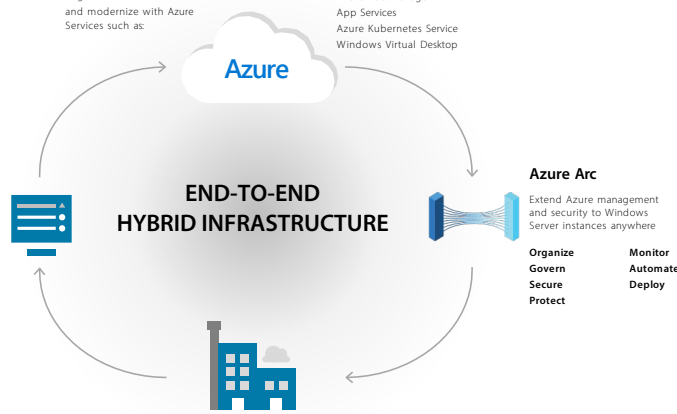

Windows Server on Azure

Migrate to Azure VMs and modernize with Azure Services such as:

Azure Automate
App Services
Azure Kubernetes Service
Windows Virtual Desktop

Windows Admin Center
Manage and enable Azure Services remotely or directly from the Azure Portal including:

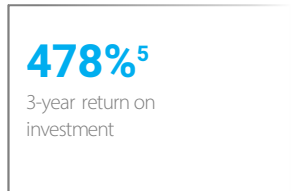

Backup Site Recovery Monitoring **Security Center Update Files**

Modernize your workloads with new and improved features on Azure

- Use Azure Automate to simplify IT management with optimized, automated operations
- Manage Windows Servers with Windows Admin Center straight from the Azure Portal
- Enable secure remote work by deploying virtual desktops and apps quickly and easily with Windows Virtual Desktop
- Gain flexibility and consistency with native .NET support in App Service

Migrate to achieve cost savings and efficiency

The Neudesic Cloud Factory

Unlock a repeatable framework with The Neudesic Cloud Factory

Our solution accelerates the typical migration and modernization timetable to provide more value to your organization in less time.

¹ IDC White Paper, sponsored by Microsoft, "Addressing Enterprise Cloud Priorities with Microsoft Azure," June 2020.
² Price-performance claims based on data from a study commissioned by Microsoft and conducted by GigaOm in February 2020. The study compared price-performance between SQL Server 2019 Enterprise Edition on Windows Server 2019 Datacenter edition on Azure EC2, r5a.BurLarge instance type with P30 Premium SSD Disks and the SQL Server 2019 Enterprise Edition on Windows Server 2019 Datacenter edition in AWS EC2, r5a.BurLarge instance type with General Purpose (gp2) volumes. Benchmark data is taken from a GigaOm Analytic Field Test derived from a recognized industry standard, TPC Benchmark™ E (TPC-E). The Field Test does not implement the full TPC-E benchmark and as such is not comparable to any published TPC-E benchmarks. Prices are based on publicly available US pricing in West US for SQL Server on Azure Virtual Machines and Northern California for AWS EC2 as of January 2020. The pricing incorporates the available reservations for Azure and AWS compute pricing, and Azure Hybrid Benefit for SQL Server and Azure Hybrid Benefit for Windows Server and License Mobility for SQL Server in AWS, excluding Software Assurance costs. Actual results and prices may vary based on configuration and region.
